

W I N T E R 2 0 2 4 - 2 5

Born in 1888 in France, Bollé is the market leading solution for eyewear and helmets.

Globally respected and worldwide distributed, **Bollé is known as the most advanced design and creative sport brand,** which creates trends and pushes industry boundaries.

| PERFORMANCE INNOVATION SINCE 1888 |

OUR VISION

VISION BEYOND

Confidence is a state of mind in which we seek to free ourselves. For many of us, it is a trigger to progress, to move forward. It is a goal achieved through training, failure, perseverance and success.

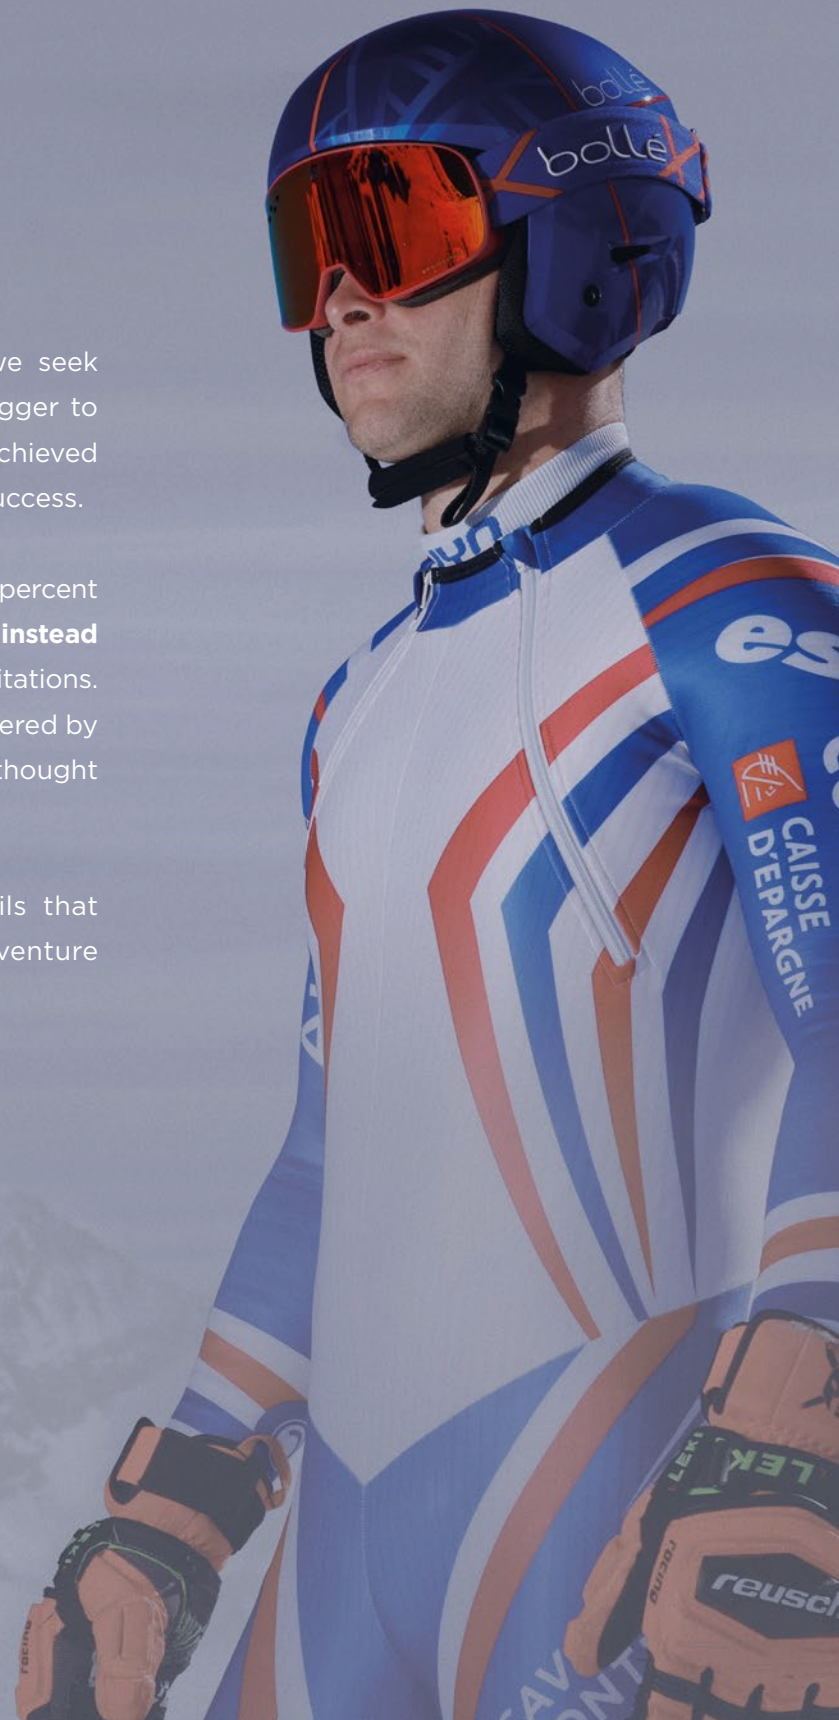

Confidence is not about being one hundred percent certain, it's about **seeing possibilities instead of obstacles**, opportunities instead of limitations. Once you've gained confidence, you are powered by **a vision** that takes you further than you ever thought possible.

Bollé designs gear with an eye for details that make all the difference, enabling you to venture further than ever before :

**BEYOND BOUNDARIES,
BEYOND WHAT OTHERS SEE,
BEYOND YOURSELF.**

OUR INITIATIVE

REACT FOR GOOD

AT BOLLÉ, WE DON'T CLAIM WE ARE GOING TO SAVE THE PLANET, BUT **WE DO STRIVE TO REDUCE OUR IMPACT.**

FOLLOWING THE RELEASE OF THE COMPANY'S FIRST SUSTAINABLE DEVELOPMENT REPORT, THE TEAM PUSHED EVEN FURTHER FOR THE AUTUMN/WINTER 24-25 SEASON TO KEEP OUR **LEADING POSITION.**

WITH 2 ADDITIONAL HELMETS (THE INTEGRATED VISOR X-FUSION FAMILY & DUAL-CERTIFIED YPSOS FAMILY) AND THE NEW MOUNTAIN-INSPIRED ASTERIA SUNGLASSES), WE ARE PROUD TO CONFIRM THAT WE HAVE **THE WIDEST RANGE OF ECO-DESIGNED WINTER SPORTS PRODUCTS AVAILABLE ON THE MARKET TODAY.**

[DISCOVER THE VIDEO](#)

AND ALL THIS IS BROUGHT TO YOU IN A **100% ECO-DESIGNED PACKAGING.**

BRAND HISTORY

1888

A FAMILY BUSINESS

Seraphin Bollé created the brand Bollé; known at this time as one of the first company to use newly developed celluloid, which becomes the basis for Bollé products during those early decades.

1956

CAT-EYES

Georges Bollé created the famous nylon 'cat-eyes' sunglass.

2007

SKI HELMETS

Launch of the first line of ski helmets. A front-line player in the winter sports landscape.

2021

VOLT

A revolutionary high-contrast lens.

2024

X-FUSION

Launch of the first fully integrated visor: The ultimate crossover.

1936

SUNGLASSES

The brand launches its first sunglasses and becomes quickly the pioneer of molded Nylon.

1960

SKI GOGGLES

Ski goggles were first marketed by Bollé.

2018

PHANTOM+

Launch of the best photochromic sports lens ever.

2023

REACT FOR GOOD

Launch of a full eco-designed winter range.

ATMOS PURE

Plum Tie & Dye Matte

The grungy tie-dye products' capsule reveals our new core-inspired colour concept with free-spirited and rebellious connotations. In line with our commitment to remain close to nature, we imagined a raw and eco-aware design technology. We chose to apply on-trend and unisex dark plum tones on 3 goggles and 1 helmet so that there is one for everyone!

EXCELLENCE IN PRODUCT INNOVATION & CREATIVITY

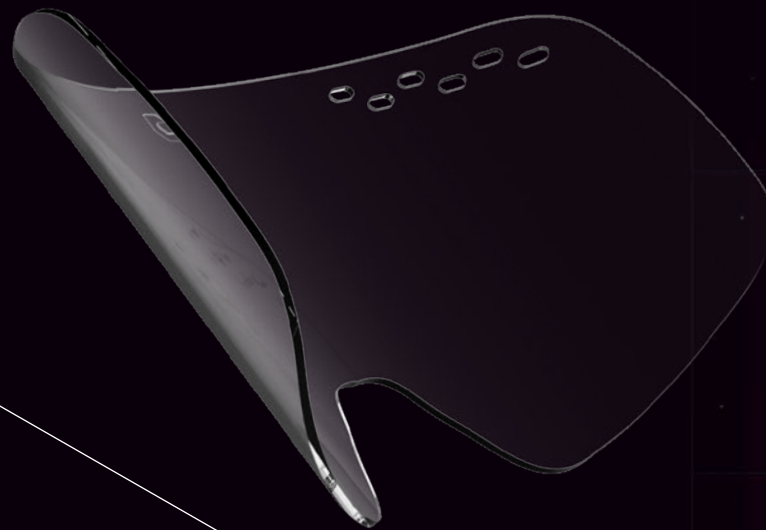

EPIC is Bollé's design and innovation program which allows our Research and Development teams to **develop the best and most innovative, performance driven products** available in the marketplace.

LENS SEGMENTATION

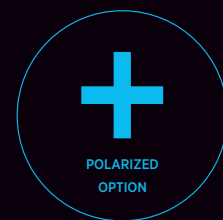

3 LEVELS OF PERFORMANCE

PHOTOCHROMIC

REVEAL THE INVISIBLE WITH THE BEST LENS IN THE MARKET

Searching for a competitive advantage, superior protection, or an extraordinary visual experience? We thought so. That's why we created Phantom, Bollé's first photochromic lens with phenomenal optical clarity.

POLARIZED OPTION

Block light reflections for even more eye comfort

HIGH CONTRAST

EXPERIENCE THE POWER OF COLOUR WITH AN EXCEPTIONAL HIGH CONTRAST FILTER

To see colours like never before, you need to test colours like never before. Which is why Bollé used artificial intelligence to evaluate over 20 million colour enhancement possibilities. In the end, only one formula provided an incomparable colour experience and it's so unique, it is patented. It's called Volt and it now establishes a whole new standard for high contrast lenses.

SUPERIOR LIGHT FILTER

ESSENTIAL

EXCELLENT VISIBILITY WITH 100% UV PROTECTION

A standard polycarbonate lens, for excellent visibility and protection.

Available in photochromic option.

HIGHEST PERFORMANCE LENS AVAILABLE

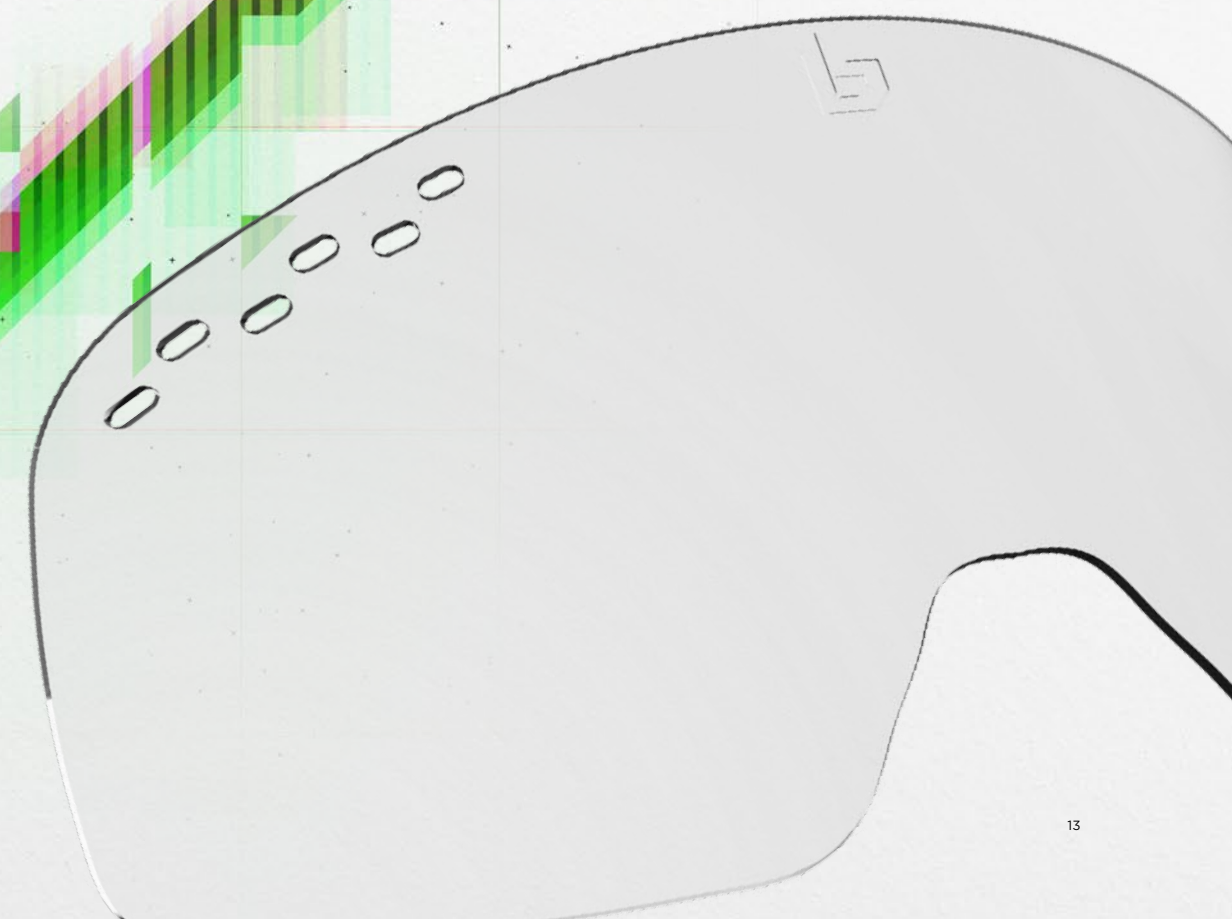

PHOTOCHROMIC NXT MATERIAL (OPTICAL CLARITY, LIGHTNESS, RESISTANCE) / HIGH CONTRAST FILTER / POLARIZED OPTION

REVOLUTIONARY COLOUR ENHANCEMENT LENS

HIGH CONTRAST

SUPERIOR LIGHT FILTER

POLYCARBONATE / PHOTOCHROMIC OPTION

Light Adaptive Lens Technology

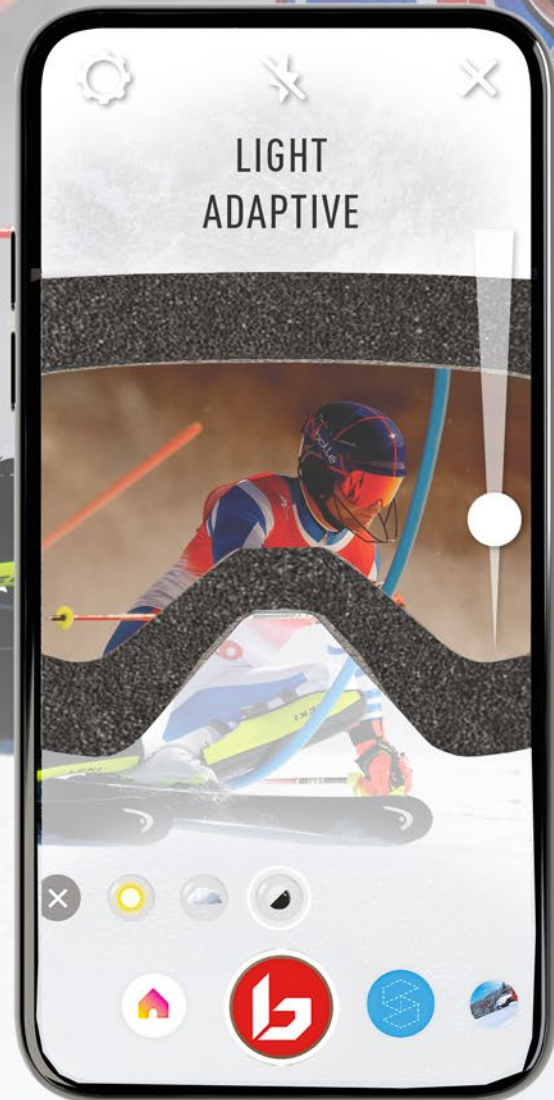

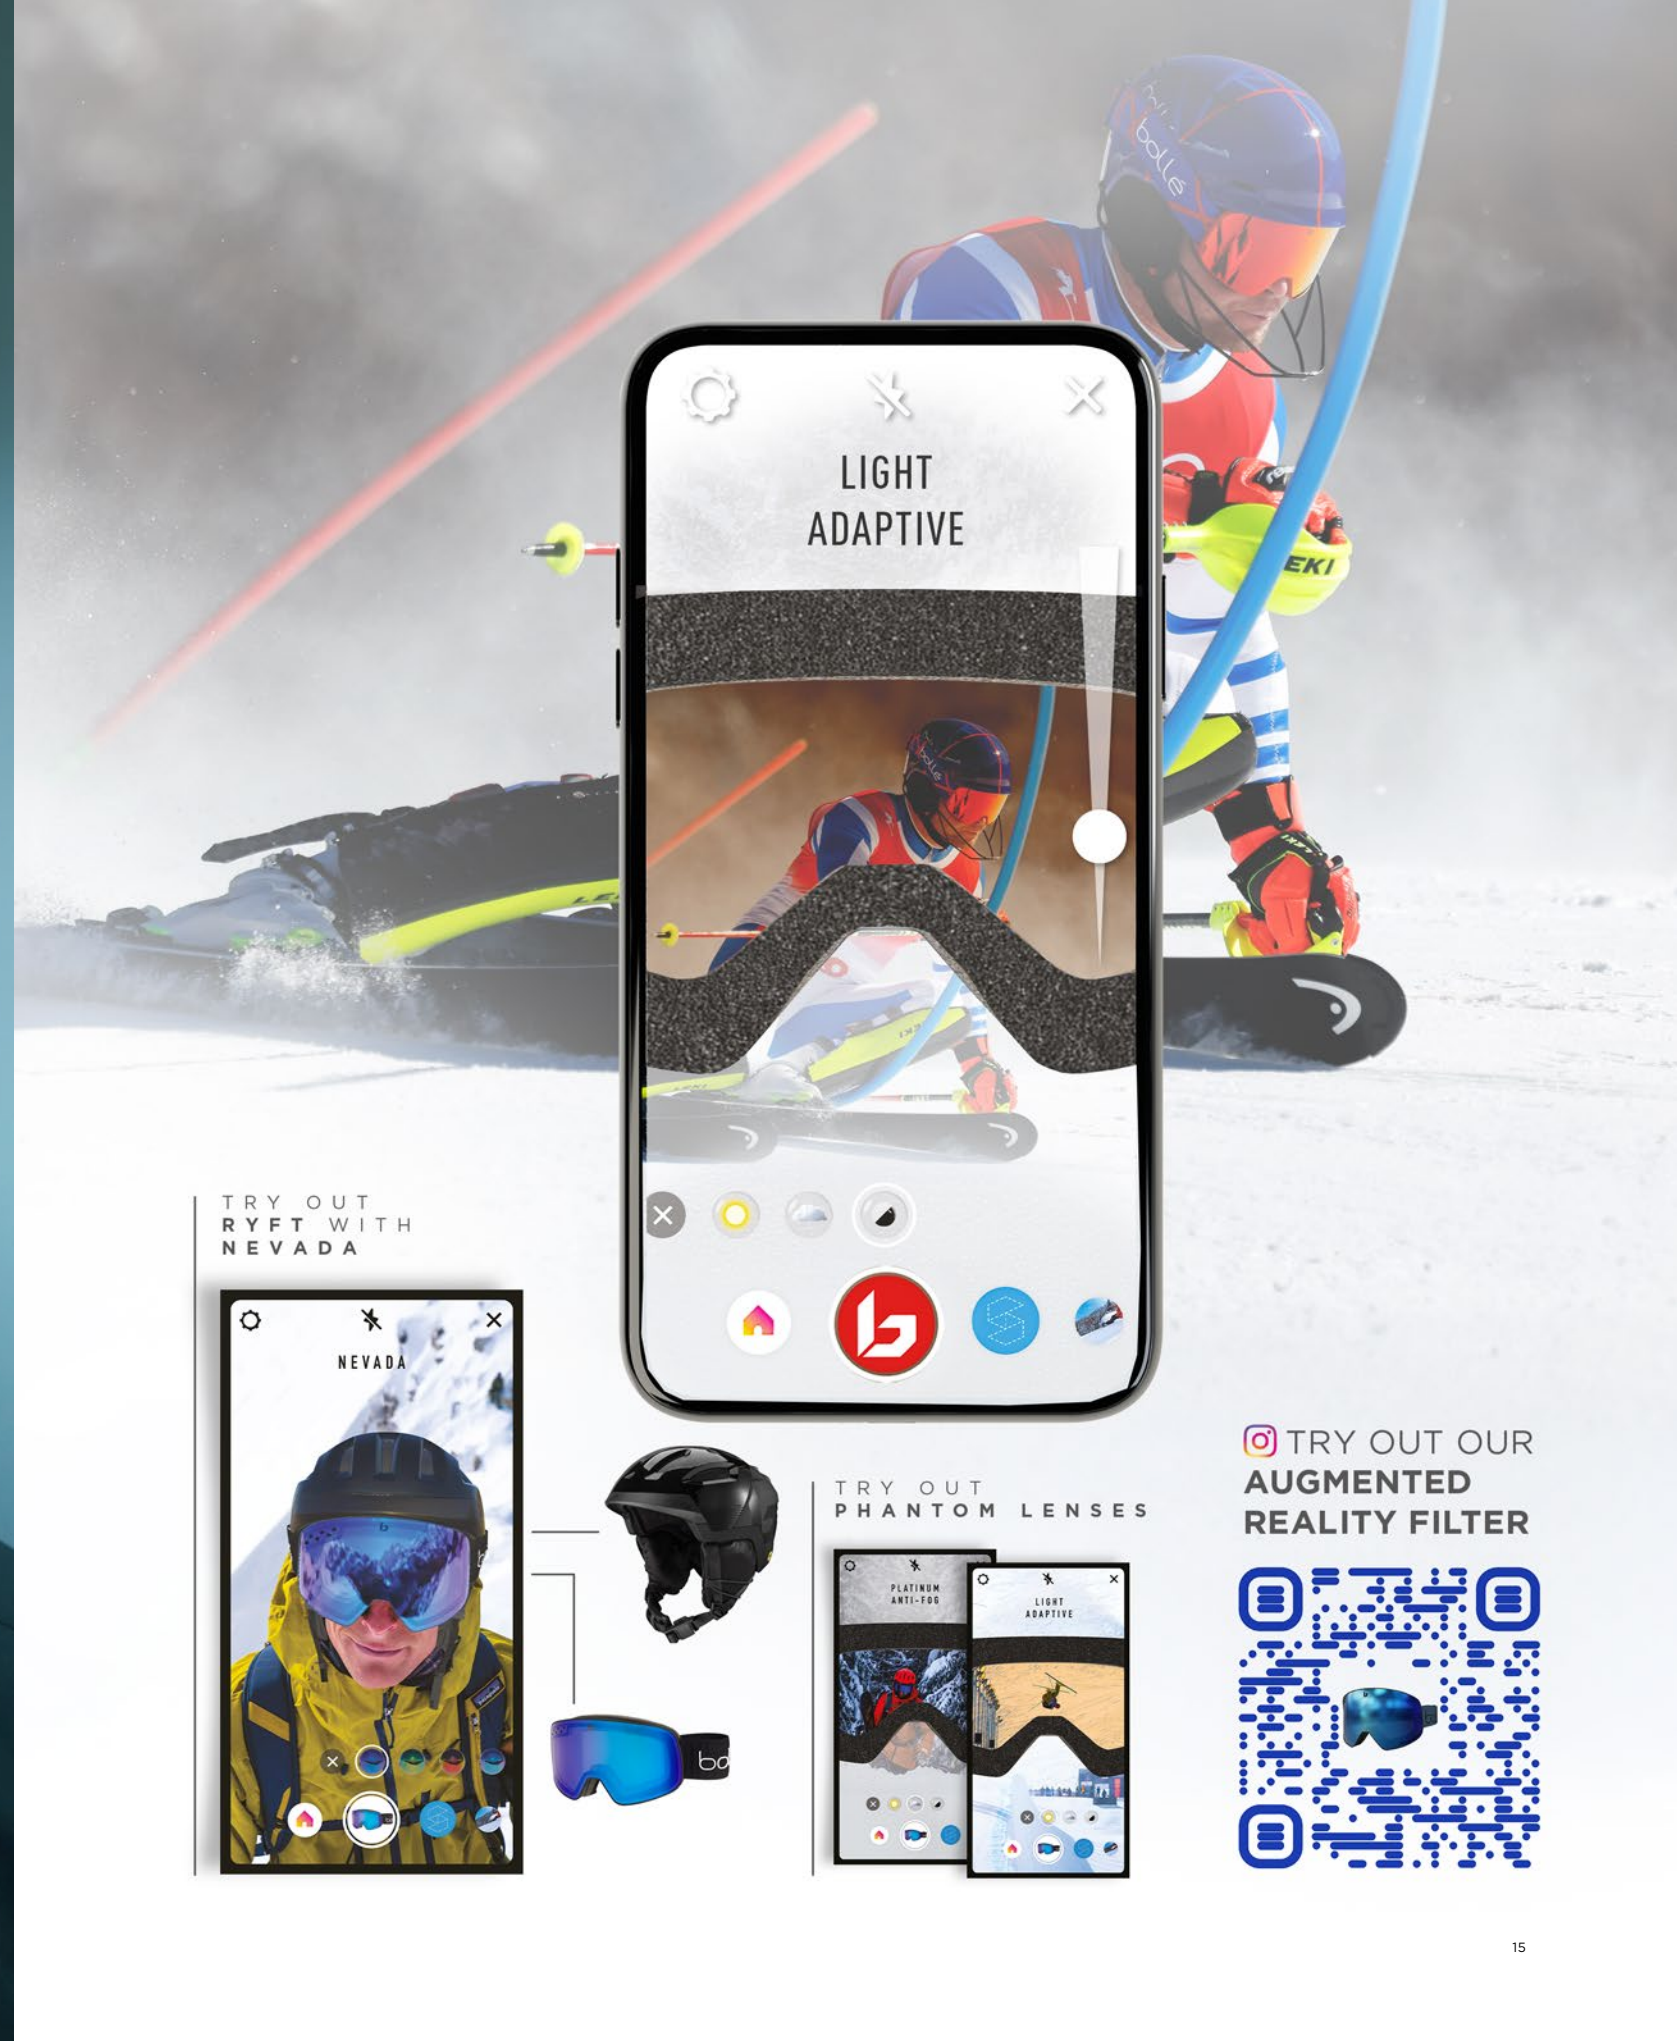

PHANTOM

Adaptation is key. Get the best vision, no matter the conditions, with Phantom photochromic lenses.

TRY OUT OUR AUGMENTED REALITY FILTER

PHOTOCHROMIC PERFORMANCE

Phantom lens technology achieves a wide range of visible light transmission, ensuring precise visual acuity in all weather conditions, including the most extreme. Our lens tint reaches **70% of its full activation within 20 seconds.**

PROTECTIVE COATING

A true reference in the world of eye protection, Bollé Safety offers protective glasses trusted by professional workers in demanding industries like automotive, construction, mining, or pharmaceutical.

◆ **PLATINUM** represents the highest level of expertise in anti-fog and anti-scratch protection.

With **Phantom and Phantom+**, Bollé brings this expertise to everyone combining a higher performing anti-fog with an anti-scratch that is 40% more durable than the standard.

HIGH IMPACT RESISTANCE

NXT™ lenses not only protect you 100% from harmful UV rays, but are also built for maximum impact resistance. NXT™ is one of the strongest materials on the market. Originally adapted from military use - jet canopies and helicopter windshields - lenses are subjected to rigorous high-velocity impact tests.

OPTICAL CLARITY

Made with NXT™ material, Phantom lenses raise the optical clarity of our lenses to a new level. NXT™ material is packed with a lot of features such as optimal clarity, lightweight, high impact resistance, chemical resistance, and of course 100% UV protection. Ideal for a sport use, Phantom lenses will offer maximum protection & comfort of vision for your eyes.

STABILITY

Bollé has advanced the performance of photochromic technology to an entirely new level. The Phantom lens with exclusive LTS Technology (Low Temperature Sensitivity), delivers improved activation, **darkening or lightening whether the temperature is -25°C or 5°C.**

DISCOVER THE VIDEO

THE BEST KEEPS GETTING BETTER WITH PHANTOM+
LIGHT ADAPTIVE LENS TECHNOLOGY

POLARIZATION

Polarized lenses are largely recognized today for their benefits in terms of blocking reflected glare. So it felt right to add them to our already unbeatable lens technology to improve its performance by yet another step. Equipped with Phantom+ lenses, you will be ready to take on any adventure.

VISION ENHANCEMENT

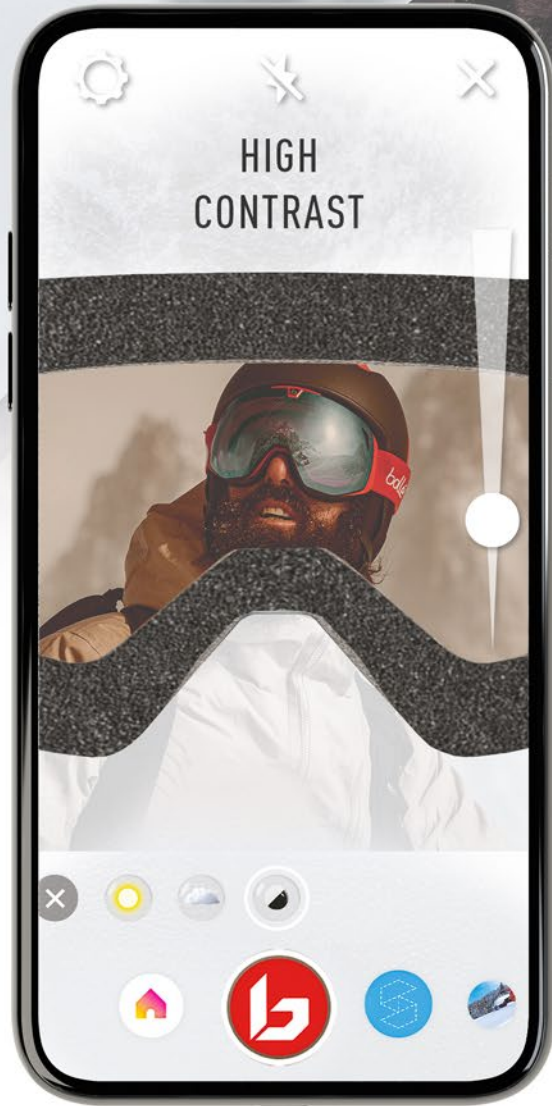

The Bollé 50% polarized film works like a moderately dense net that reduces distracting glare while getting enough light transmission through the lens in order to distinguish ice from snow. Phantom+ equipped with this technology offers an optimized reading of the terrain while reducing eye fatigue.

DISCOVER THE KEY VISUAL

CLEAR

Protect your eyes during night or foggy conditions.

YELLOW

Ideal for low light conditions, yellow lenses enhance depth perception for improved visibility.

PINK

Excellent for a variety of conditions, pink lenses maximize colour definition and depth perception.

AMBER

Great for bright light conditions, amber lenses manage yellow light for optimal comfort.

BROWN

Ideal for sunny conditions, brown lenses amplify color contrast and deliver superior visual definition.

GREY

Grey lenses maintain natural color perception, ideal for bright light conditions.

FRAME SEGMENTATION

DESIGNED FOR EVERYDAY'S COMPETITORS

ULTIMATE RANGE

Iconic product for competitors wanting the absolute best.

EVOLUTION RANGE

Performance product for men and women who are committed to their sport.

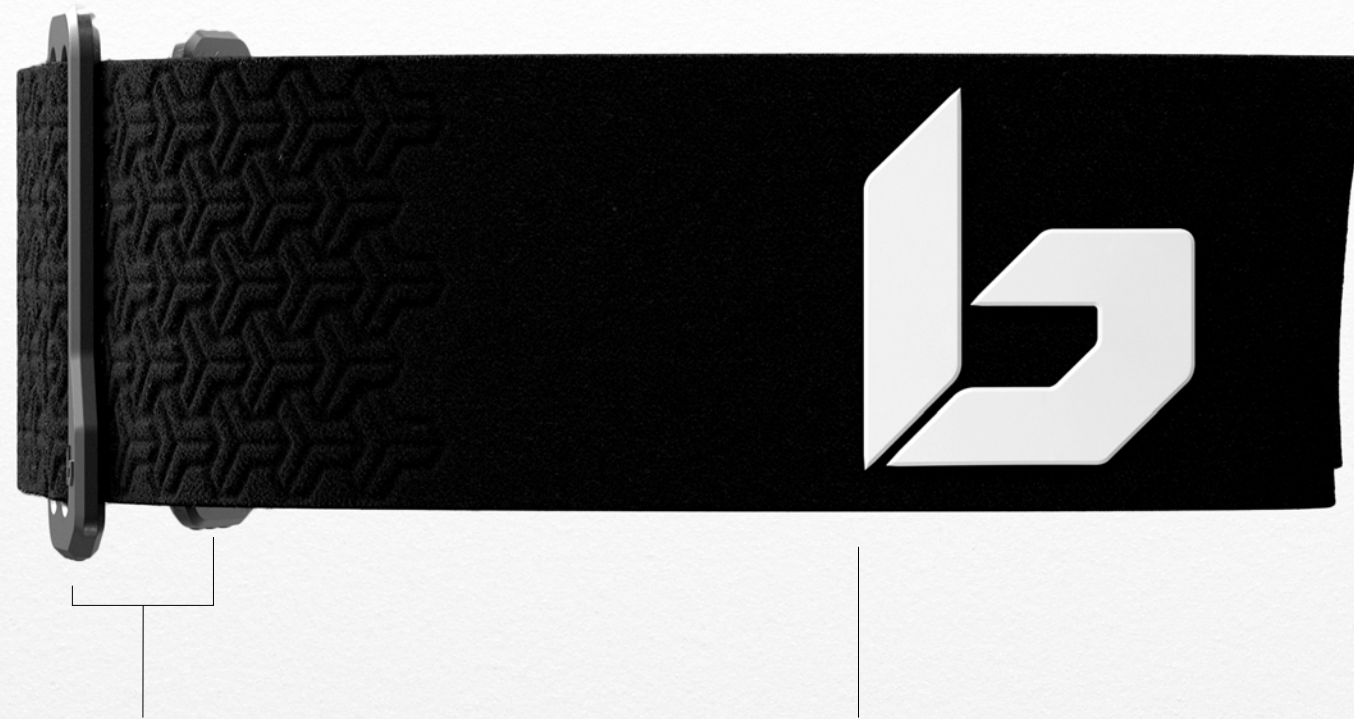

ESSENTIAL RANGE

High quality product for people who appreciate the values of sport and look for sporty design.

FRAME TECHNOLOGY

Wearing Bollé's ultimate lenses is key to enhancing your vision of the world, yet it is not enough. At Bollé we give extra attention to details and technology while creating our frames, in order to ensure you get the most comfortable and reliable eyewear for your ride.

DUAL STRAP ADJUSTERS

The two separate adjusters will let you easily set up your goggles perfectly the way you want.

SILICONIZED STRAP

That sweet addition is there to make sure that once on your head, your goggles will never slip out of position.

OTG FRIENDLY

Our Over The Glasses (OTG) goggles are specifically designed to be worn over your prescription glasses. They are deeper than ordinary goggles and their foam design allows a perfect fit with the eyeglass temples.

TRIPLE DENSITY FOAM WITH FLEECE

Our most high-end goggles are equipped with a triple foam construction for outstanding comfort over extended periods of time.

THERMOFORMED NOSEFOAM

This area is specifically designed to perfectly fit your nose. It is so comfortable you'll forget you are even wearing goggles.

AVAILABLE WITH SUPERIOR LIGHT FILTER PHOTOCHROMIC, VOLT AND PHANTOM

Volt is our ultimate high contrast lens with 30% colour enhancement (closest competitor is at 15%). Phantom is the best photochromic lens out there, with an outstanding optical clarity.

LENS VENTS

An opening in the lens, with foam inserts to block debris, that allows for better air circulation and prevents fogging.

INJECTED DOUBLE LENS

This construction creates a thermal barrier between your eyes and the outside, that, combined with the lens vents, will make sure fogging is a thing from the past.

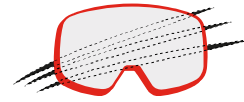

GOGGLES FEATURES

Find below all of the other advanced technologies featured on our products.

P-80+ ANTI-FOG

Embedded premium Anti-fog layer in the inner lens disperses water molecules across the surface of the lens, restricting moisture build up that can impede your crystal clear view of the terrain ahead. Available on all our goggles.

CARBO GLAS® ANTI-SCRATCH

A high-tech protective armor applied to the outer lens creates a shield to significantly reduce scratching, keeping your lenses and outlook as clear as a bluebird sky.

DOUBLE LENS

Creation of a dual-pane thermal barrier between the cold dry outside air and the moisture generated by intense activity prevents distracting condensation from forming.

UV PROTECTION

All Bollé lenses block 100% of harmful UVA/UVB

FLOW-TECH® VENTING

Engineered venting systems in each frame promote directional airflow across the inside surface of the lens, reducing the potential for moisture build up and maintaining your pristine vision.

FORESTAY™ SYSTEM

Outrigger systems are designed for goggles to sit snugly on your face, while allowing the strap to interact independently with the latest helmet designs for an integrated fit.

GOGGLES / HELMET SEAMLESS FIT

Bollé helmets and goggles are developed in parallel to ensure perfect fit, optimal ventilation and best-possible comfort.

SILICONIZED STRAP

The siliconized strap helps provide total support for the goggles on the helmet.

HELMETS TECHNOLOGY

RYFT

A REVOLUTIONARY VENTILATION SYSTEM

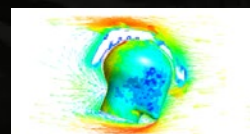

Active Panel Vent **CLOSED**

Active Panel Vent **OPEN**

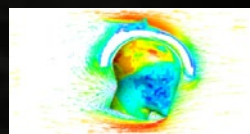

ACTIVE PANEL VENTILATION

Most snow helmets offer limited ventilation due to the difficulties encountered during the certification tests. The RYFT, on the other hand, has been designed to allow a huge air intake from vertical space around the vent opening, while the panels obstruct anything from penetrating into the headform. This revolutionary system makes it the only certified snow helmet with such a large amount of air channeling.

AIR FLOW SIMULATION

RYFT

Hybrid Competitor

FLOW TECH BRIM VENTING REAR VENTS

Flow Tech Venting in the brim connects the goggles to the internal channel on the headform side which connects to the ventilation on the exterior of the EPS but under the shell. The RYFT is composed of multiple paths all interconnected for increasing airflow.

As the RYFT provides such a significant air intake, it needs efficient air extraction. The rear shark vents allow for a huge space underneath the vent panel and effectively flush air and heat out from the helmet.

...COMING WITH HIGH-TECH FEATURES

HYBRID SHELL: THE BEST OF TWO TECH

Bollé Hybrid shell construction synergizes the key features and benefits of In-mold and ABS shell technologies.

DELUXE PERFORMANCE LINING

This lining is composed of high-end lycra that wicks away the transpiration while making sure high friction areas are padded so you stay dry and comfortable from dawn to dusk.

AVID PROGRESSIVE EPS

To make sure our helmets are as ventilated as they can be, our Research and Development team analyzed in details where EPS could be removed without diminishing the level of protection. This way, they were able to dig out channels that enhance the passive ventilation in a very efficient way. Combined with our innovative Adjustable ventilation systems, this is how you get the most ventilated helmets on the market.

FIDLOCK® MAGNETIC BUCKLE

With the integration of the magnet in the buckle, locking your helmet on your head has never been that easy, gloves on or off.

Mips

BRAIN PROTECTION SYSTEM

For ultimate protection performance, RYFT is equipped with the best brain protection of the market : MIPS® patented Brain Protection System

NEW GOGGLES RETAINER SYSTEM

Discover this new feature available on the RYFT. Lock and unlock the removable goggles clip easily even when you are wearing gloves. Then enjoy your ride without thinking about adjusting your goggles' strap, due to the integrated grooves on the back and the sides of your RYFT.

BOA® FIT SYSTEM

Engineered to push performance further, it is a fit system providing micro-adjustability for fully customized comfort and unmatched stability.

MIPS TECHNOLOGY

MULTI-DIRECTIONAL IMPACT PROTECTION SYSTEM

PATENTED SAFETY SYSTEM

LOW FRICTION LAYER

FOUNDED IN SCIENCE

THE LOW FRICTION LAYER ALLOWS A MULTI-DIRECTIONAL MOVEMENT OF 10-15 MM ON CERTAIN ANGLED IMPACTS, INTENDED TO REDUCE ROTATIONAL FORCE TO THE HEAD.

LEARN MORE: [MIPSPROTECTION.COM](https://mipsprotection.com)

AVID PROGRESSIVE EPS

INCREASED VENTILATION • ADVANCED PROTECTION

VENTILATION

Every part of a helmet doesn't need the same quantity of EPS to provide perfect protection. Our Research and Development team carefully analyzed which areas could be carved out to reduce the unnecessary amount of EPS without reducing the level of security.

This process allowed for bigger inner-space for the air to circulate and increase the passive ventilation properties as well as the weight of the helmets equipped with our AVID technology.

PROTECTION

By reducing the amount of EPS in the areas where it was possible, we virtually reduced the EPS density of those areas. That way they provide perfect protection for medium and low energy impacts by compressing upon contact while the surrounding areas with high density EPS keep your head safe from high energy impacts by absorbing the shock.

HELMET FEATURES

BOA®

Engineered to push performance further, the Boa® Fit System provides micro-adjustability for fully customized comfort and unmatched stability. Dial in your perfect fit, stay in the moment and ride with comfort with Boa®.

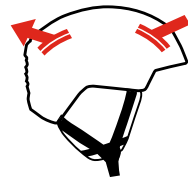

AIR FLOW EXTRACTOR

Venting holes provide constant air circulation. Cool air comes in from the front and extracts hot air at the back in order to keep your head just at the right temperature in any condition.

ADJUSTABLE VENTILATION

The Adjustable ventilation system is easy to use and enables you to control the amount of air coming in for maximized comfort.

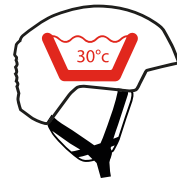

PASSIVE VENTILATION

Openings at strategic points on the helmet ensure constant airflow inside.

CLICK-TO-FIT™ SYSTEM

Our Click-To-Fit™ system allows you to fine tune the fit of your helmet easily and quickly. Our rubberized adjustment wheel lets you tighten or loosen the helmet effortlessly, even with your gloves on!

DETACHABLE LINING

Most Bollé helmets feature detachable and washable inner lining.

REMOVABLE EARPADS

Designed to be comfortable and warm, while still allowing you to hear clearly. Helmet ear pads can be removed for washing.

AUDIO KIT COMPATIBILITY

Audio kit systems* offer great stereo sound with a volume dial for quick and simple sound control. Super thin speakers can be inserted directly into Bollé earpads so you can't lose them.

*Audio kit sold separately (not in the Bollé offer).

PERFECT GOGGLES / HELMET INTEGRATION

Bollé helmets and goggles are developed in parallel to ensure perfect fit, optimal ventilation and best-possible comfort.

There is a reason some people think it was created by the luxury designers at Ferrari. The RYFT and its state-of-the-art design does what no helmet has done before. A unique and patented active panel ventilation system provides an unprecedented airflow, making the RYFT the most ventilated helmet ever designed by Bollé. Equipped with MIPS, this hybrid helmet also meets the highest impact protection norms for a safe ride in any condition. So inspiring, it is now an entire product family, with 5 additional models.

DISCOVER THE PRODUCT VIDEO

Bollé's lightest high-end model thanks to its in-mold construction. An active ventilation system with 8 vents along with goggles vents and air extractor channels below the shell make the ATMOS MIPS an extremely well-ventilated helmet. This model is also equipped with MIPS and the avid progressive EPS technology to ensure the maximum level of safety. The Click-to-Fit™ Sytem guarantees a perfect fit while the soft fleece lining and the 3D earpads provide exceptional comfort.

- Removable 3D earpads
- Removable and washable lining
- AVID Progressive EPS
- Click-to-Fit™ Sytem
- Weight: 455g

DISCOVER THE PRODUCT VIDEO

With its in mold construction, the ECO ATMOS first attributes are its lightness and comfort. Designed with eco materials including Lycra lining, straps, dividers, shell and earpads, all partially made from recycled or bio based materials along with cork mixed with the EPS, it is Bolle's first ski helmet with a sustainability approach for avid skiers who want to do their part for the planet. The active ventilation system with 8 vents also makes the ECO ATMOS one of the most ventilated helmet of the range.

True to Bollé's original wrap shape, the FENIX is designed for an active lifestyle whether in the city or in the outdoors. The 8 base frame also provides extra protection and a wide field of view. Comfort and stability are assured by our high performance features such as the Thermogrip* rubber on the temple tips and nose pads. Available with Volt+, our revolutionary high-contrast and polarized lens.

**AVAILABLE IN
99% OF
PRESCRIPTIONS**

+6.00 to -8.00 spheres with opposite
cylinders to +/-4 total power.*

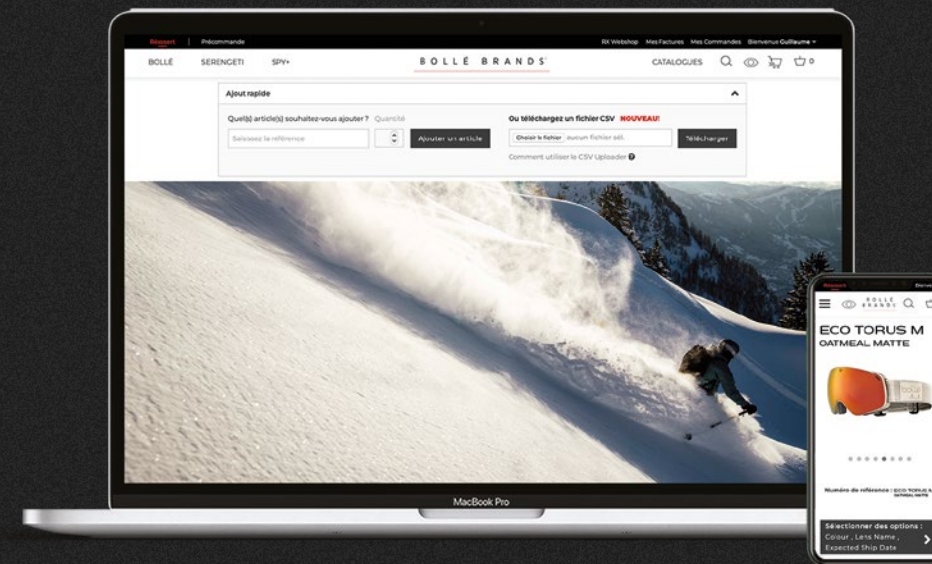

A TRANSPARENT & INTUITIVE WEBSHOP

Since September 2022, a more informative and easier-to-use version of the RX webshop has been made available to opticians, to make the ordering process even smoother. You can enter the prescription details of the frame wearer and the webshop will automatically filter the available frame & lens combinations corresponding to the prescription. A lens thickness calculator also helps you to anticipate the best solution for each wearer.

Visit our webshop : <https://rx.bollebrands.com/>

*For progressive lenses the maximum positive is SPH+ADD.

B2B ORDERING PLATFORM

<http://www.b2b-bollebrands.com>
