WINTER 2023 - 24

bolle®

| PERFORMANCE INNOVATION SINCE 1888 |

Born in 1888 in France, Bollé is
the market leading solution for
eyewear and helmets.

Globally respected and worldwide
distributed, **Bollé is known as the
most advanced design and creative
sport brand**, which creates trends
and pushes industry boundaries.

bollé®

| PERFORMANCE INNOVATION SINCE 1888 |

OUR VISION

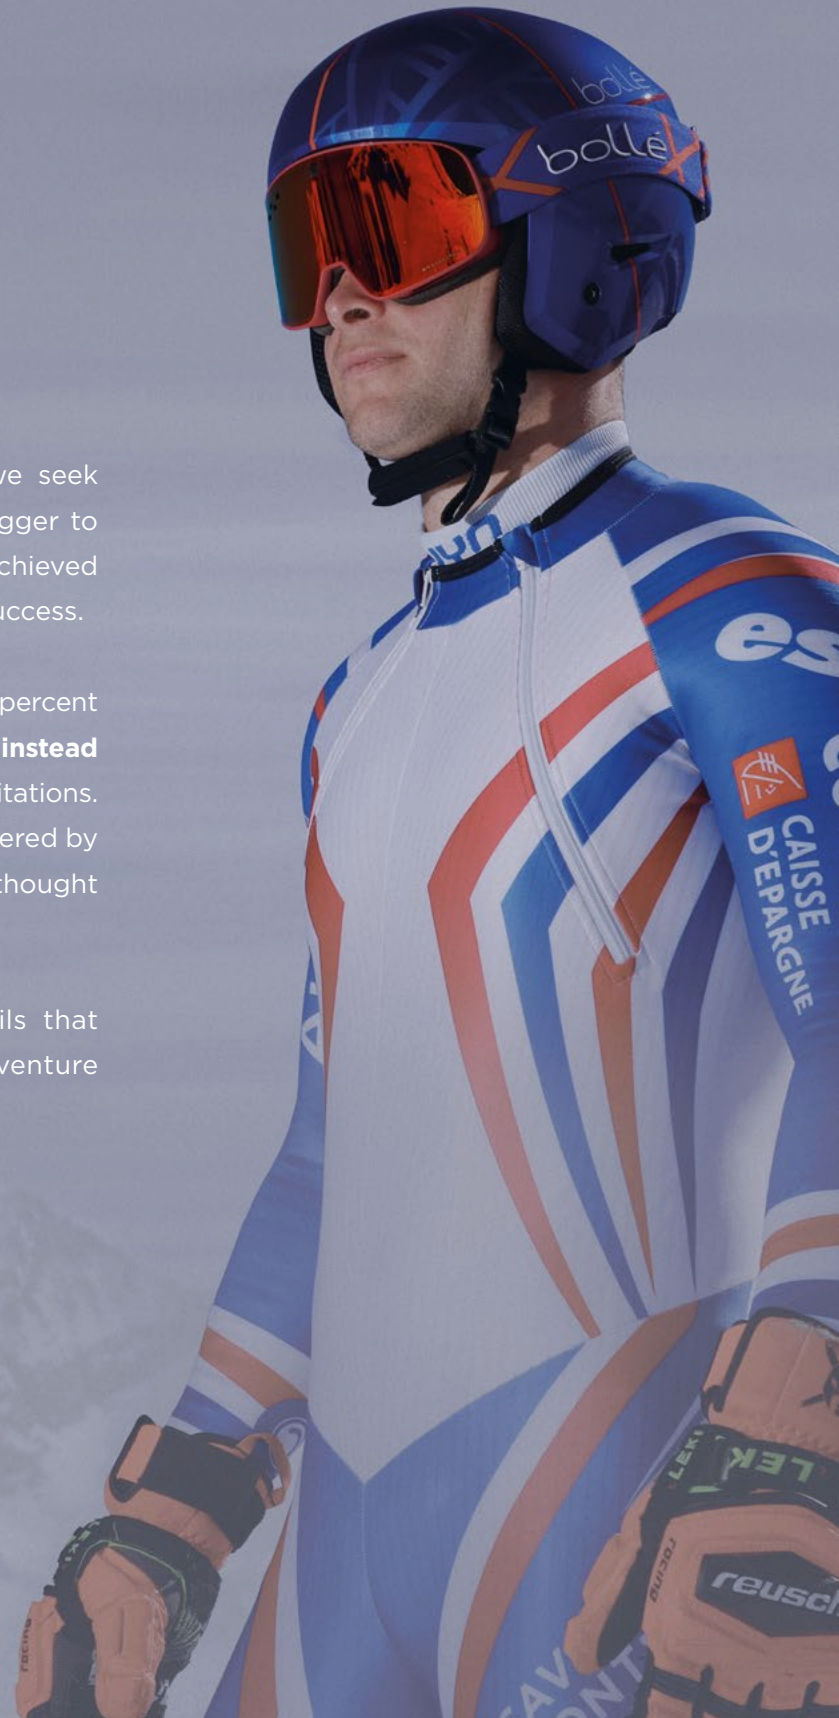

VISION BEYOND

Confidence is a state of mind in which we seek to free ourselves. For many of us, it is a trigger to progress, to move forward. It is a goal achieved through training, failure, perseverance and success.

Confidence is not about being one hundred percent certain, it's about **seeing possibilities instead of obstacles**, opportunities instead of limitations. Once you've gained confidence, you are powered by **a vision** that takes you further than you ever thought possible.

Bollé designs gear with an eye for details that make all the difference, enabling you to venture further than ever before :

**BEYOND BOUNDARIES,
BEYOND WHAT OTHERS SEE,
BEYOND YOURSELF.**

OUR INITIATIVE

REACT FOR GOOD

AT BOLLÉ, WE DON'T CLAIM WE ARE GOING TO SAVE THE PLANET, BUT **WE DO STRIVE TO REDUCE OUR IMPACT.**

FOR THE 23/24 WINTER SEASON, THE BOLLÉ TEAM HAS Poured ALL ITS ENERGY INTO PURSUING ITS APPROACH TOWARDS SUSTAINABILITY WITH THE NEXT PHASE OF ITS "REACT FOR GOOD" PROGRAM.

WE ARE PROUD TO ANNOUNCE THAT WE ARE LAUNCHING **THE WIDEST RANGE OF ECO-DESIGNED WINTER SPORTS PRODUCTS AVAILABLE ON THE MARKET** WITH AN HYBRID HELMET, AN IN-MOLD HELMET, A VISOR HELMET, A PAIR OF TORIC GOGGLES, A PAIR OF CYLINDRICAL GOGGLES AND 5 PAIRS OF MOUNTAIN SUNGLASSES.

AND ALL THIS IS BROUGHT TO YOU IN A 100% ECO-DESIGNED PACKAGING.

RECYCLED FIBER
PLANT-BASED INK
WATER-BASED GLUE

BRAND HISTORY

1888

A FAMILY BUSINESS

Seraphin Bollé created the brand Bollé; known at this time as one of the first company to use newly developed celluloid, which becomes the basis for Bollé products during those early decades.

1956

CAT-EYES

Georges Bollé created the famous nylon 'cat-eyes' sunglass.

2007

SKI HELMETS

Launch of the first line of ski helmets. A front-line player in the winter sports landscape.

2020

RYFT

The most ventilated snow helmet in the market.

CHRONOSHIELD

2023

REACT FOR GOOD

Launch of a full eco-designed winter range.

1936

SUNGLASSES

The brand launches its first sunglasses and becomes quickly the pioneer of molded Nylon.

1960

SKI GOGGLES

Ski goggles were first marketed by Bollé.

2018

PHANTOM+
LIGHT ADAPTIVE LENS TECHNOLOGY

Launch of the best photochromic sports lens ever.

2021

VOLT
HIGH CONTRAST ENHANCED COLOUR

A revolutionary high-contrast lens.

EXCELLENCE IN PRODUCT INNOVATION & CREATIVITY

EPIC is Bollé's design and innovation program which allows our Research and Development teams to develop the best and most innovative, performance driven products available in the marketplace.

LENS SEGMENTATION

3 LEVELS OF PERFORMANCE

PHOTOCHROMIC

REVEAL THE INVISIBLE WITH THE BEST LENS IN THE MARKET

Searching for a competitive advantage, superior protection, or an extraordinary visual experience? We thought so. That's why we created Phantom, Bollé's photochromic lens with phenomenal optical clarity.

HIGH CONTRAST

EXPERIENCE THE POWER OF COLOUR WITH AN EXCEPTIONAL HIGH CONTRAST FILTER

To see colours like never before, you need to test colours like never before. Which is why Bollé used artificial intelligence to evaluate over 20 million colour enhancement possibilities. In the end, only one formula provided an incomparable colour experience and it's so unique, it is patented. It's called Volt and it now establishes a whole new standard for high contrast lenses.

SLF

SUPERIOR LIGHT FILTER

EXCELLENT VISIBILITY WITH 100% UV PROTECTION

The Superior Light Filter lens (SLF) is a polycarbonate lens with an anti-scratch and anti-fog coating which offers excellent visibility and protection.

POLARIZATION OPTION

Block light reflections for even more eye comfort

SLF

HIGHEST PERFORMANCE LENS ON THE MARKET

THE BEST KEEPS GETTING BETTER...

PHOTOCHROMIC PERFORMANCE

Phantom lens technology achieves a wide range of visible light transmission, ensuring precise visual acuity in all weather conditions, including the most extreme. Our lens tint reaches **70% of its full activation within 20 seconds.**

PROTECTIVE COATING

A true reference in the world of eye protection, Bollé Safety offers protective glasses trusted by professional workers in demanding industries like automotive, construction, mining, or pharmaceutical.

◆ **PLATINUM** represents the highest level of expertise in anti-fog and anti-scratch protection.

With **Phantom and Phantom+**, Bollé brings this expertise to everyone combining a higher performing anti-fog with an anti-scratch that is 40% more durable than the standard.

HIGH IMPACT RESISTANCE

NXT[™] lenses not only protect you 100% from harmful UV rays, but are also built for maximum impact resistance. NXT[™] is one of the strongest materials on the market. Originally adapted from military use - jet canopies and helicopter windshields - lenses are subjected to rigorous high-velocity impact tests.

OPTICAL CLARITY

Made with NXT[™] material, Phantom lenses raise the optical clarity of our lenses to a new level. NXT[™] material is packed with a lot of features such as optimal clarity, lightweight, high impact resistance, chemical resistance, and of course 100% UV protection. Ideal for a sport use, Phantom lenses will offer maximum protection & comfort of vision for your eyes.

STABILITY

Bollé has advanced the performance of photochromic technology to an entirely new level. The Phantom lens with exclusive LTS Technology (Low Temperature Sensitivity), delivers improved activation, **darkening or lightening whether the temperature is -25°C or 5°C.**

... AND BETTER WITH PHANTOM+

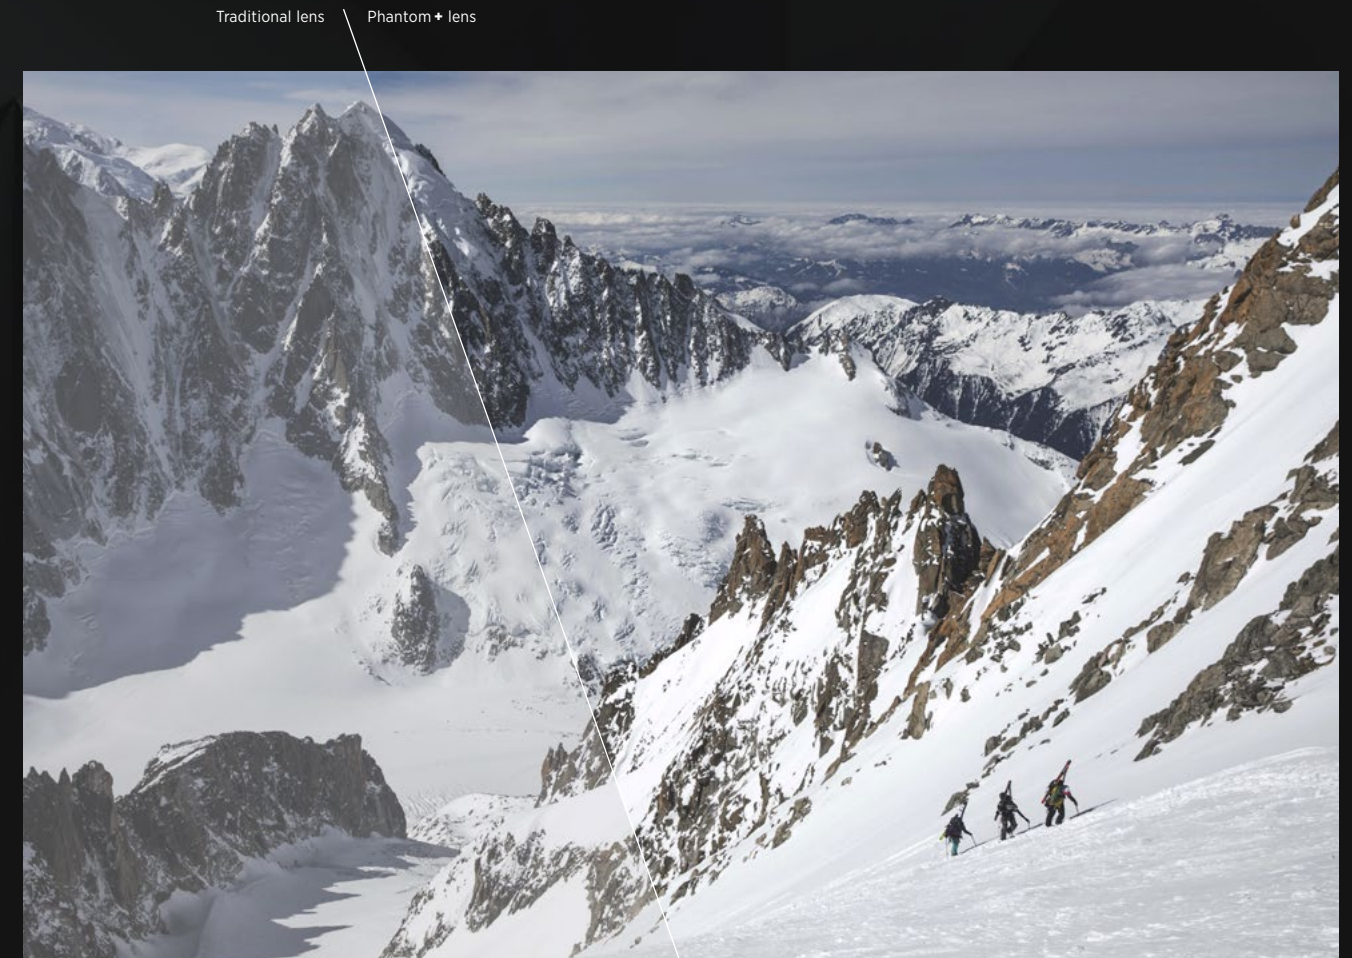

LIGHT ADAPTIVE LENS TECHNOLOGY

POLARIZATION

Polarized lenses are largely recognized today for their benefits in terms of blocking reflected glare. So it felt right to add them to our already unbeatable lens technology to improve its performance by yet another step. Equipped with Phantom+ lenses, you will be ready to take on any adventure.

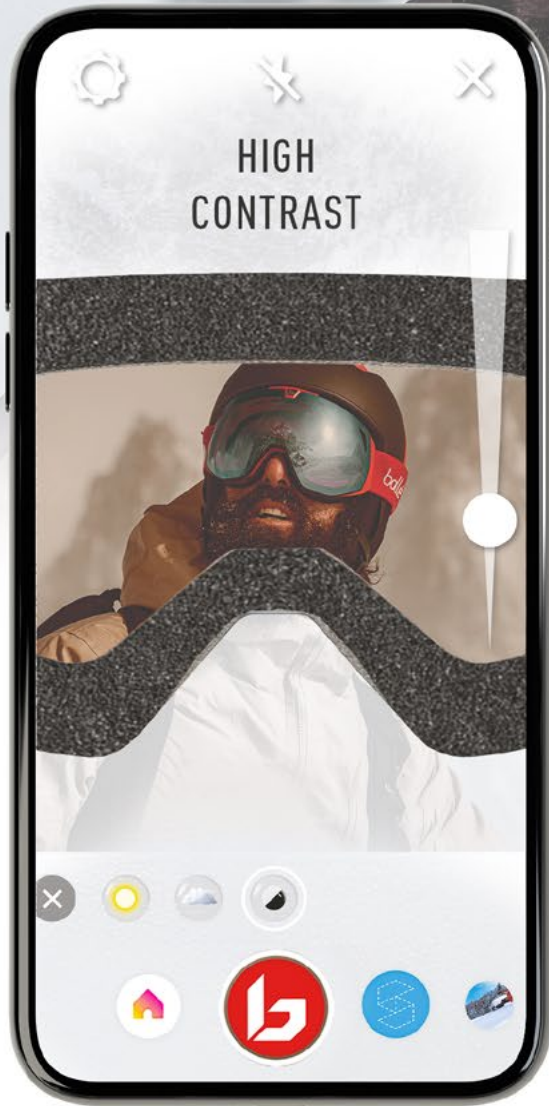

VISION ENHANCEMENT

The Bollé 50% polarized film works like a moderately dense net that reduces distracting glare while getting enough light transmission through the lens in order to distinguish ice from snow. Phantom+ equipped with this technology offers an optimized reading of the terrain while reducing eye fatigue.

FRAME SEGMENTATION

DESIGNED FOR EVERYDAY'S COMPETITORS

ULTIMATE RANGE

Iconic product for competitors wanting the absolute best.

EVOLUTION RANGE

Performance product for men and women who are committed to their sport.

ESSENTIAL RANGE

High quality product for people who appreciate the values of sport and look for sporty design.

FRAME TECHNOLOGY

Wearing Bollé's ultimate lenses is key to enhancing your vision of the world, yet it is not enough. At Bollé we give extra attention to details and technology while creating our frames, in order to ensure you get the most comfortable and reliable eyewear for your ride.

DUAL STRAP ADJUSTERS

The two separate adjusters will let you easily set up your goggles perfectly the way you want.

SILICONIZED STRAP

That sweet addition is there to make sure that once on your head, your goggles will never slip out of position.

TRIPLE DENSITY FOAM WITH FLEECE

Our most high-end goggles are equipped with a triple foam construction for outstanding comfort over extended periods of time.

LENS VENTS

An opening in the lens, with foam inserts to block debris, that allows for better air circulation and prevents fogging.

THERMOFORMED NOSEFOAM

This area is specifically designed to perfectly fit your nose. It is so comfortable you'll forget you are even wearing goggles.

AVAILABLE WITH SUPERIOR LIGHT FILTER, VOLT AND PHANTOM

Volt is our ultimate high contrast lens with 30% colour enhancement (closest competitor is at 15%). Phantom is the best photochromic lens out there, with an outstanding optical clarity.

INJECTED DOUBLE LENS

This construction creates a thermal barrier between your eyes and the outside, that, combined with the lens vents, will make sure fogging is a thing from the past.

GOGGLES FEATURES

Find below all of the other advanced technologies featured on our products.

P-80+ ANTI-FOG

Embedded premium Anti-fog layer in the inner lens disperses water molecules across the surface of the lens, restricting moisture build up that can impede your crystal clear view of the terrain ahead. Available on all our goggles.

CARBO GLAS® ANTI-SCRATCH

A high-tech protective armor applied to the outer lens creates a shield to significantly reduce scratching, keeping your lenses and outlook as clear as a bluebird sky.

DOUBLE LENS

Creation of a dual-pane thermal barrier between the cold dry outside air and the moisture generated by intense activity prevents distracting condensation from forming.

UV PROTECTION

All Bollé lenses block 100% of harmful UVA/UVB

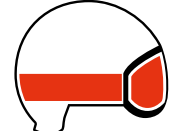

FLOW-TECH® VENTING

Engineered venting systems in each frame promote directional airflow across the inside surface of the lens, reducing the potential for moisture build up and maintaining your pristine vision.

FORESTAY™ SYSTEM

Outrigger systems are designed for goggles to sit snugly on your face, while allowing the strap to interact independently with the latest helmet designs for an integrated fit.

GOGGLES / HELMET INTEGRATION

Bollé helmets and goggles are developed in parallel to ensure perfect fit, optimal ventilation and best-possible comfort.

SILICONIZED STRAP

The siliconized strap helps provide total support for the goggles on the helmet.

HELMET TECHNOLOGY

RYFT

A REVOLUTIONARY VENTILATION SYSTEM

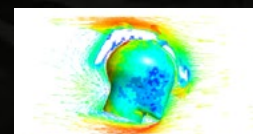

Active Panel Vent **CLOSED**

Active Panel Vent **OPEN**

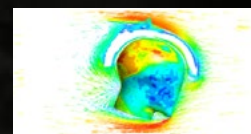

ACTIVE PANEL VENTILATION

Most snow helmets offer limited ventilation due to the difficulties encountered during the certification tests. The RYFT, on the other hand, has been designed to allow a huge air intake from vertical space around the vent opening, while the panels obstruct anything from penetrating into the headform. This revolutionary system makes it the only certified snow helmet with such a large amount of air channeling.

AIR FLOW SIMULATION

RYFT

Hybrid Competitor

FLOW TECH BRIM VENTING

Flow Tech Venting in the brim connects the goggles to the internal channel on the headform side which connects to the ventilation on the exterior of the EPS but under the shell. The RYFT is composed of multiple paths all interconnected for increasing airflow.

REAR VENTS

As the RYFT provides such a significant air intake, it needs efficient air extraction. The rear shark vents allow for a huge space underneath the vent panel and effectively flush air and heat out from the helmet.

...COMING WITH HIGH-TECH FEATURES

HYBRID SHELL: THE BEST OF TWO TECH

Bollé Hybrid shell construction synergizes the key features and benefits of In-mold and ABS shell technologies.

DELUXE PERFORMANCE LINING

This lining is composed of high-end lycra that wicks away the transpiration while making sure high friction areas are padded so you stay dry and comfortable from dawn to dusk.

AVID PROGRESSIVE EPS

To make sure our helmets are as ventilated as they can be, our Research and Development team analyzed in details where EPS could be removed without diminishing the level of protection. This way, they were able to dig out channels that enhance the passive ventilation in a very efficient way. Combined with our innovative Adjustable ventilation systems, this is how you get the most ventilated helmets on the market.

FIDLOCK® MAGNETIC BUCKLE

With the integration of the magnet in the buckle, locking your helmet on your head has never been that easy, gloves on or off.

Mips

BRAIN PROTECTION SYSTEM

For ultimate protection performance, RYFT is equipped with the best brain protection of the market : MIPS® patented Brain Protection System

NEW GOGGLES RETAINER SYSTEM

Discover this new feature available on the RYFT. Lock and unlock the removable goggles clip easily even when you are wearing gloves. Then enjoy your ride without thinking about adjusting your goggles' strap, due to the integrated grooves on the back and the sides of your RYFT.

BOA® FIT SYSTEM

Engineered to push performance further, it is a fit system providing micro-adjustability for fully customized comfort and unmatched stability.

MIPS TECHNOLOGY

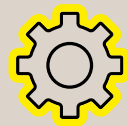

MULTI-DIRECTIONAL IMPACT PROTECTION SYSTEM

PATENTED SAFETY SYSTEM

LOW FRICTION LAYER

FOUNDED IN SCIENCE

THE LOW FRICTION LAYER ALLOWS A MULTI-DIRECTIONAL MOVEMENT OF 10-15 MM ON CERTAIN ANGLED IMPACTS, INTENDED TO REDUCE ROTATIONAL FORCE TO THE HEAD.

LEARN MORE: [MIPSPROTECTION.COM](https://mipsprotection.com)

AVID PROGRESSIVE EPS

INCREASED VENTILATION • ADVANCED PROTECTION

VENTILATION

Every part of a helmet doesn't need the same quantity of EPS to provide perfect protection. Our Research and Development team carefully analyzed which areas could be carved out to reduce the unnecessary amount of EPS without reducing the level of security.

This process allowed for bigger inner-space for the air to circulate and increase the passive ventilation properties as well as the weight of the helmets equipped with our AVID technology.

PROTECTION

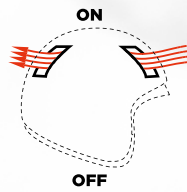

By reducing the amount of EPS in the areas where it was possible, we virtually reduced the EPS density of those areas. That way they provide perfect protection for medium and low energy impacts by compressing upon contact while the surrounding areas with high density EPS keep your head safe from high energy impacts by absorbing the shock.

HELMET FEATURES

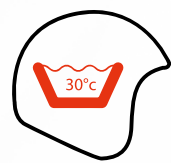

BOA®

Engineered to push performance further, the Boa® Fit System provides micro-adjustability for fully customized comfort and unmatched stability. Dial in your perfect fit, stay in the moment and ride with comfort with Boa®.

AIR EXTRACTOR

Venting holes provide constant air circulation. Cool air comes in from the front and extracts hot air at the back in order to keep your head just at the right temperature in any condition.

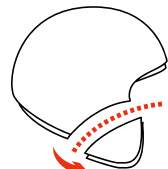

DETACHABLE LINING

Most Bollé helmets feature detachable and washable inner lining.

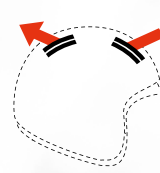

ADJUSTABLE VENTILATION

The Adjustable ventilation system is easy to use and enables you to control the amount of air coming in for maximized comfort.

REMOVABLE EARPADS

Designed to be comfortable and warm, while still allowing you to hear clearly. Helmet ear pads can be removed for washing.

PASSIVE VENTILATION

Openings at strategic points on the helmet ensure constant airflow inside.

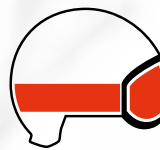

CLICK-TO-FIT™ SYSTEM

Our Click-To-Fit™ system allows you to fine tune the fit of your helmet easily and quickly. Our rubberized adjustment wheel lets you tighten or loosen the helmet effortlessly, even with your gloves on!

AUDIO KIT

Our audio kit system offers great stereo sound with a volume dial for quick and simple sound control. Super thin speakers are inserted directly into Bollé earpads so you can't lose them.
*Audio kit sold separately

PERFECT GOGGLES / HELMET INTEGRATION

Bollé helmets and goggles are developed in parallel to ensure perfect fit, optimal ventilation and best-possible comfort.

There is a reason some people think it was created by the luxury designers at Ferrari. The RYFT and its state-of-the-art design does what no helmet has done before. A unique and patented active panel ventilation system provides an unprecedented airflow, making the RYFT the most ventilated helmet ever designed by Bolle. Equipped with MIPS, this hybrid helmet also meets the highest impact protection norms for a safe ride in any condition. So inspiring, it is now an entire product family, with 5 additional models.

The ECO RYFT PURE MIPS offers a perfect alternative to its famous big brother. Part of our React for Good campaign, it is Bolle's first eco-designed hybrid helmet combining lightness and robustness. Designed to exceed all the expectations of the most demanding skiers wanting to do their part for the planet, the inner and outer shell, straps, dividers, fit system, goggles' retainer, padding, and earpads are all partially made from recycled or bio-based materials. Equipped with MIPS for brain safety, it also features the AVID Progressive EPS for better protection. This model offers active ventilation with 6 vents, a Click-to-Fit™ system, and 3D earpads for optimum comfort and hearing.

- Click-to-Fit™ Sytem
- Weight: 435g

As part of the ATMOS collection, the ATMOS PURE combines lightness with comfort thanks to its in-mold construction and its 3D earpads. This model features the Avid progressive EPS system for safety and the click to fit system to ensure the right fit. The ATMOS PURE is also equipped with 9 passive ventilations, goggles vents and air extractor channels to make sure it is well ventilated. A great value for money.

The ECO ATMOS now comes with a 100% bio-sourced photochromic visor to become Bollé's first eco-designed visor helmet. Designed for avid skiers who want to do their part for the planet, the straps, dividers, fit system, goggles' retainer, padding, and earpads are all partially made from recycled or bio-based materials along with cork mixed with the EPS. Light and comfortable thanks to its in-mold construction, the ECO V-ATMOS also features an active ventilation system with 8 vents that guarantees great airflow.

The very first Junior visor helmet from Bolle: we took all of the great technologies of the QUIZ and then added a visor to create the exciting QUIZ VISOR. The durable and tough ABS hard shell sits on top of an EPS liner to provide good protection against impacts and sharp objects. The Air Extractor vents keep the head cool and the Click-To-Fit™ system provides great comfort, adjusting the size as kids grow.

One of our most popular performance models. Great for cycling, the SHIFTER offers maximum comfort and perfect stability with a Thermogrip® nose piece and rubber on the curved temples. A specially conceived vented lens optimizes the airflow and prevents fogging. Available with Phantom, our best photochromic lens for a phenomenal vision or with Volt+, our revolutionary high contrast and polarized lens.

A lighter version of the SHIFTER, the LIGHTSHIFTER stands out thanks to its semi-frameless style giving the model a great look. Perfectly adapted for cycling, the LIGHTSHIFTER presents all the technologies of the SHIFTER family: Thermogrip® inserts and adjustable nose piece for stability, S-Fit temples for helmet integration and vented lens. Available with Phantom, our best photochromic lens for a phenomenal vision or with Volt+, our revolutionary high contrast and polarized lens.

NEW

AVAILABLE TECHNOLOGIES

Available with
Volt+ High Contrast Polarized Lens
Integrated small side shields
with perforated pattern
Metal top bar
Snap hinge
Thermogrip® temple tips
Thermogrip® nose pads
45% bio-based material
(made with renewable castor oil)

New addition to the Bollé's sports lifestyle collection, the ARCADIA is a square navigator frame with a mountain inspiration. With its retro and oversized look, the ARCADIA offers a refined and elegant design for a bold and confident style. True to the brand's sports DNA, this model is also equipped with Thermogrip® temple tips and nose pads along with snap hinges. The metal top bar and the integrated side shields with perforated pattern give a nice touch to the frame showing the importance given to every detail. Also a part of our React for Good campaign, the ARCADIA is made of 45% bio-based material. Available with Volt+, Bollé's revolutionary high contrast and polarized lens.

EXPERIENCE THE ULTIMATE IN PRESCRIPTION

PRECISION OPTICS

- Available with Phantom technology: optical photochromic lenses
- Available with VOLT+ technology: optical high-contrast and polarized lenses
- Adjustable nose piece and temples
- Hydrophobic/Oleophobic coating

WIDE RANGE OF MODELS

Our prescription technology is now integrated on our spherical shields frames (e.g. Icarus, Chronoshield, Lightshifter...) and most shield lens colours are available.

AVAILABLE IN 99% OF PRESCRIPTION

+6.00 to -8.00 spheres with opposite cylinders to +/-4 total power.*

*For progressive lenses the maximum positive is SPH+ADD

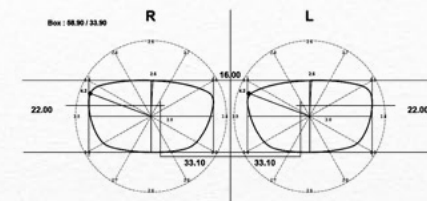

XXL FIELD OF VIEW

Laser cut inserts (no optical clip) for optimal lightness

PRESCRIPTION PROGRAM

ADVANCED TECHNOLOGY AND PREMIUM SERVICE

Software using the most advanced calculations is used to create customized lenses and the ultimate in lightweight products. Every prescription is reassessed to compensate for optical distortions related to the frame wrap angle. When the prescription reaches the limits of the conventional digital surfacing method, our patented algorithm calculates the best lens geometry regarding the optical area, the transition zone and reduces the edge thickness (US patent number 8,002,404). Every product is customized to the prescription, frame and wearer's facial metrics, ensuring optimum precision, comfort and frame balance for sports sunglasses.

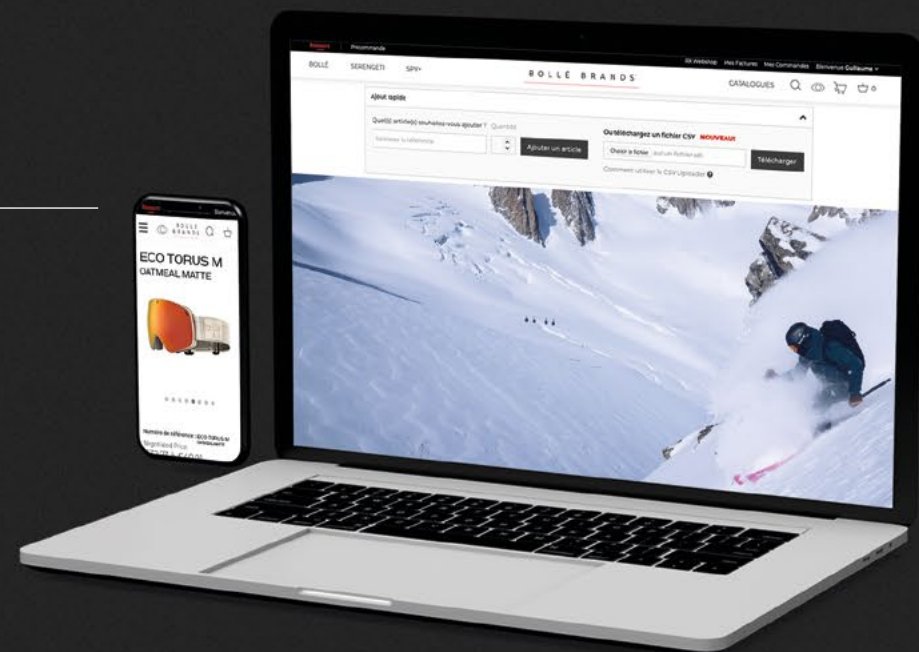

- 1 VISIT OUR WEBSHOP**
<https://rx.bollebrands.com/>
- 2 JUST A FEW CLICKS**
IS ALL IT TAKES
- 3 PLACE YOUR ORDER**
ONLINE

A TRANSPARENT & INTUITIVE WEBSHOP

Since Fall 2022, a new version of the RX Webshop (Link : <https://rx.bollebrands.com>) has been made available to the opticians, to make the RX ordering process even smoother. More informative, easier to use : you can enter the prescription details of the frame wearer and the webshop will automatically filter for you the available frame & lens combinations corresponding to his (her) prescription. A lens thickness calculator also helps you to anticipate the best solution for each wearer.
